

The K-Beauty Trend Pipeline.

Before Your Feed Knows It Exists.

Everyone's selling the same products.

The winners find what Korea is buying — before it hits global feeds.

TIME VS. MONEY

MANUAL RESEARCH

Find trending product	8 hrs
Verify market demand	6 hrs
Find Korean supplier	12 hrs
Analyze 6 global markets	16 hrs
Export + logistics check	8 hrs

Total: ~50 hours per product

KOREAScout

WHY TRUST US

Built our own AI engine from scratch. Our Seoul team verifies every signal by hand.

We didn't buy a tool. We built one.

Then we put boots on the ground in Korea to make sure the data is real.

Language barrier?

Eliminated.

Next viral trend?

Pre-scouted.

Sourcing & logistics?

Handled.

WHO WE ARE

**K-Commerce B2B
Business Development
Specialist**
Coupang & Shinhan Bank

Coupang — Korea's Amazon

Shinhan Bank

We didn't learn Korean commerce from a YouTube video.

We spent years inside Korea's #1 ecommerce company and a major financial institution doing B2B business development — learning how Korean supply chains, pricing structures, and distribution channels actually work from the inside.

That's the difference between a tool that scrapes data and a team that understands what the data actually means.

HOW WE BUILT IT

**Korean Government Startup
Program selectee**

Selected by the Ministry of SMEs.
Government-backed validation of our AI intelligence platform. A recognized startup — not a random freelancer.

Gov. Certified

Ministry of SMEs

WHY IT WORKS

Seoul-based. Human-verified. Not scraped.

500+ products scanned weekly. 50+ cross-border signals per report. Real data from real people on the ground in Korea.

500+ weekly scans

50+ signals/report

PACKAGES

- Direct inquiry link

ELITE SCOUT

\$100 / report

- 5 product reports
- Everything in Pro Scout
- 4K Field Footage (Raw)
- Product demo + texture
- Filmed in Seoul, Korea

FREQUENTLY ASKED QUESTIONS

01

What category of products do you research?

We specialize in **K-beauty and skincare products** trending across all major Korean platforms — Naver, Hwahaе, Glowpick, Olive Young, and more.

02

How do you find trending products?

We scan **500+ Korean products weekly** using data from Naver Data Lab, Hwahaе, and Glowpick — then cross-reference with global marketplace availability to identify real opportunities before they go viral.

03

Do you source or ship the products?

No. We provide **intelligence reports only**. You source and sell — we scout. The harder a product is to source, the less competition you'll face.

04

Is it possible to research products outside of K-beauty?

Currently we specialize in K-beauty and skincare only. However, within K-beauty we can focus on **specific subcategories** such as serums, sunscreens, eye patches and more. Message us before ordering to confirm your needs.

We Scout. You Sell.

Don't guess. Scout smarter.
